Marywood Breeders Group Female Sale 2022

Carson's Sales Arena Listowel

Saturday, November 19th 2022 at 12:30 pm

Welcome

Marywood Simmentals is the legacy of almost four decades of intensive genetic development. Our breeding program is designed to produce high performance breeding bulls and replacement females with the increased maternal and carcass traits needed to put our customers ahead in today's competitive beef industry. This tradition is carried forward through the Marywood Breeders Group. Our mission is to produce superior Simmental genetics that are demonstrated through measurable performance, ultrasound and carcass evaluations. Our breeding selections are made based on a complete balance with skeletal structure, conformation, body length, tenderness, maternal traits, fertility, docility, longevity and feed efficiency; all backed by EPD's. This program allows us to offer you animals that are at the top of the breed for adding more lean meat yield, calving ease, and maternal traits to your herd. You can find more information about our selection process on our website. We improve our numbers every year so that you can improve yours. We pride ourselves on our animals because of the strong positive influence they can have on your calf crop and breeding program! I've been in the industry my whole life and love talking about cattle. If you have any question about selecting a bull, or questions about the numbers we use please contact me and I'd be happy to work with you to make sense of it all. Bolster your herd with a good young bull or replacement female and then let them work for you. You will be happy with the results!

Thank you for all your support.

Josh

Remember: If you can not make it sale day you can always watch online

Online video streaming day of sale. Buyers must pre-register with Carson's no later than day before sale on Fri, to live bid over phone day of sale. Office PH: 519-291-2049.

MARYWOOD SIMMENTALS

Josh Wooddisse and Taika von Konigslow
 8491 Line 14 RR1 Palmerston, ON N0G 2P0 (519) 362 -5373 marywood@marywood.ca

My wife and I are carrying on the Marywood Simmental name with a growing herd of our own. We have a small offering this year, but we have selected genetics that we believe in. We are both involved in the agricultural industry at home and at work. I have been involved in cattle and supporting industries for most of my life. My wife Taika, is a large animal veterinarian and researcher. This is our passion, to strive to produce animals that have better EPDs every year. We look at many metrics, measurements, and genetic evaluations to help us produce progeny that outperform their dams. We look to improve our herd so that you can improve yours and build towards a more profitable tomorrow. The female we are offering all go back to the very productive Joviale cow from 21 mar 1974.

Josh

1 MARYWOOD SWEET BREEZE 14J

Black Polled Simmental Open Heifer

TRIPLE C SINGLETARY S3H
RICHWOOD ADMIRAL 26A
 RICHWOOD 138N SUPREME 88X
 MAPLE ROSE SUPERMAN
MARYWOOD EBONY 1B
 WAYDAMAR BLK TORNADO 6Y

Reg# 1410034 08-Jul-21
 MRJW 14J birth weight: 86lbs.

CSA	CE	BW	WW	YW	Milk	MCE	MWW
EPDs	9.3	2.8	83.4	129.1	30.7	7.8	72.4

This heifer has some of the best EPDs I have seen. Her mother has been a very productive cow. Her mother goes all the way back to the Joviale cow one of the first Simmental born in Canada and had 31 calves. This moderate framed heifer comes from a long line of females that have survived the test of time.

2 MARYWOOD BLACK EQUINOX 28J

Black Polled Simmental Open Heifer

ELLINGSON LEGACY M229
TNT R77'S LEGACY Z330
 TNT MISS R77
 OAKVIEW BREAKING BAD 11B
WAYDAMAR RED FLAIRE 50F

MCROBDON SIMMENTALS

Bob and Donna McFarlane
9548 Wellington Rd.6, RR#6, Mount Forest, Ont N0G 2L0 519-323-7350

McRobdon Simmentals are pleased to be joining other members of the Marywood Breeders Group for this fall sale. Over the past few years we have used some of the top Simmental AI Sires to deepen the genetic base for our herd. The performance is a result of careful genetic selection to provide you with foundation females. You will find a sampling of this in the bred and open heifers that we offer today. Buy with confidence.

If you have any questions, please call or email. Hope to see or hear from you on sale day.

Bob

WAYDAMAR SIMMENTALS

Dave, Gayle & Grant Milliner

225641 Southgate Rd #22, RR1 Dundalk, ON N0C 1B0 519-375-0122 or 519-377-9188 milliner.dg@gmail.com

Our family has been breeding Simmentals for over 45 years. After a 2 year pause in the Marywood sale it is good to be back with a sale offering. We were fortunate over the last 2 years to sell most of our heifers as a group and ramp up our own bull testing program on the farm. It has rewarding to see our 2020 and 2021 heifer groups we sold produce working well for the new owners. Our cattle offer both seedstock and commercial beef operation cattle that are not pampered and are bred for efficiency, fertility, performance, carcass qualities to produce red meat, with marbling and low fat cover. Temperament is Gayle's department and big part of our breeding goals. This year we are reducing our herd by 8 young cows as it is time to slow down a bit more. We are also consigning 10 bred heifers and 3 open heifers we are very proud of carrying our tattoo. The bred heifers, cows and open are an exception group that we confident in. Definitely keepers if we were expanding our herd. Call us if you have any questions about our sale consignments or if you need a new yearling, extra age or two year old bull for the 2023 breeding season.

Exposed to our homozygous black heifer bull WAYDAMAR BLK MATTHEWS 67H, Due: Nov - Mar 2023

Canadian Simmental Association EPD's

Calving Ease (CE) – The ease with which a bull's calves are born to first calf heifers. A first calf heifer is defined as a female calving for the first time at 33 months of age or less. EPDs are reported as the expected difference in unassisted calvings. When comparing calving ease EPDs of two sires, the larger EPD indicates a higher percent of unassisted births for calves sired by this bull.

Birth Weight (BW) – Calf weight at birth adjusted to a mature dam equivalent. Expected progeny performance is reported in pounds. The EPD value predicts the difference in average birth weight of a bull's calves, compared to calves of all other bulls evaluated. When comparing the birth weight EPDs of two sires, the larger EPD indicates a heavier average birth weight for calves sired by this bull.

Weaning Weight (WW) – Calf weight taken between 160 and 250 days of age and adjusted to 205 days of age and a mature dam equivalent. Expected progeny performance is reported in pounds. The EPD value predicts the difference in average 205-day weight of an animal's calves compared to calves of all other animals evaluated. When comparing the weaning weight EPDs of two sires, the larger EPD indicates a heavier average weaning weight for calves sired by this bull.

Yearling Weight (YW) – Weight taken between 330 and 440 days of age and adjusted to 365 days of age and a mature dam equivalent. Expected progeny performance is reported in pounds. The EPD value predicts the difference in average 365-day weight of an animal's progeny, compared to the progeny of all other animals evaluated. When comparing the yearling weight EPDs of two sires, the larger EPD indicates a heavier average yearling weight for calves sired by this bull.

Milk – The maternal ability of an animal's daughters. Expected progeny performance is reported in pounds of calf weaning weight. The EPD value predicts the difference (due to maternal ability) in average 205-day weight of an animal's daughters calves, compared to calves of daughters of all other evaluated animals. When comparing the milk EPDs of two sires, the larger milk EPD indicates heavier average weaning weights due to the daughters' greater maternal ability.

Maternal Calving Ease (MCE) – The ease with which a sire's daughters calve as first calf heifers. A first calf heifer is defined as a female calving for the first time at 33 months of age or less. Expected progeny differences are reported as the difference in % unassisted calvings. When comparing the maternal calving ease EPDs of two sires, the larger EPD indicates a higher percentage of unassisted births for calves born to this sire's daughters. Maternal Calving Ease = ½ of the CE EPD + Maternal Calving Ease.

Maternal Weaning Weight (MWW) – The weaning weight of an animal's daughters' calves. Expected progeny performance is reported in pounds. The EPD value predicts the difference in average 205-day weight of an animal's daughters' calves compared to calves from daughters of all other animals evaluated. The evaluation reflects both the maternal ability of an animal's daughters and the growth potential of their calves. When comparing maternal weaning weight EPDs of two sires, the larger maternal weaning weight EPD indicates heavier weights due to daughters' ability to produce heavier calves.
